mamivac®

MAMILLOMETER

Find the correct size of nipple shields

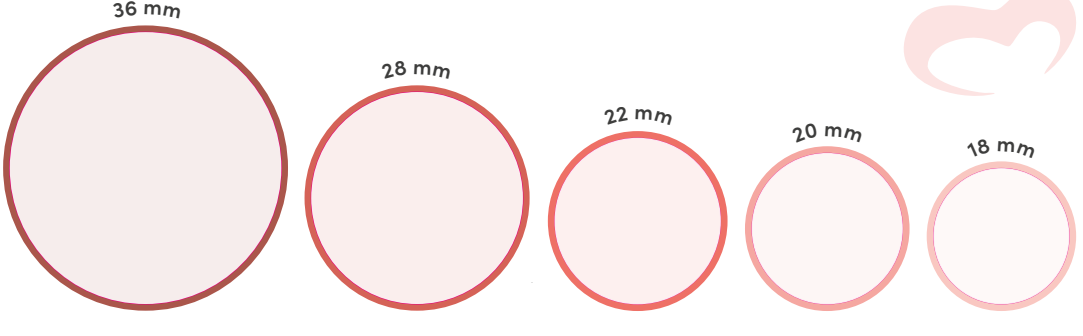

conical

- **S** = 12-18 mm
- **M** = 16-20 mm
- **L** = 20-28 mm

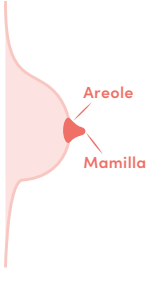

cherry shaped

- **S** = 12-18 mm
- **M** = 16-22 mm
- **L** = 20-28 mm

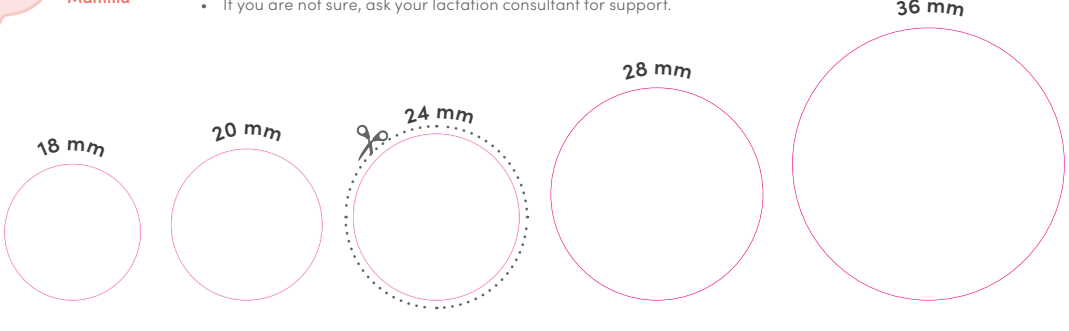

How do you find the correct size?

Place the different punched rings over your nipple and check which size you need.

- The size of the nipple shield depends on the mamilla and not on the areola.
- Take the measurement in a relaxed atmosphere.
  If the nipple has about 2 mm of leeway, you have found the nipple shield with the correct fit.
- If you are not sure, ask your lactation consultant for support.
